One possible version:

Hello, everyone! I'm glad to have this chance to share some ideas about garbage classification with you.

To my understanding, the earth is home to every individual, and it's our duty to protect the environment voluntarily. By sorting the waste, we can not only reduce pollution but also save energy, which will pave the way for the recycling of valuable resources.

For the sake of our environment and life, we are expected to learn to sort the rubbish and make it a habit.

Thank you!
