参考范文

Technology is constantly changing our life. We're benefiting a lot from the changes that are caused by technology in our daily life.

To begin with, scientific and technological innovation shortens the distance between people. We can use smartphones and the Internet to keep in touch with our family and friends easily. Besides, artificial intelligence can do a lot automatically, which makes our life more convenient and comfortable. What's more, as students, we can search for relevant information and resources through the Internet, which makes our study more efficient.

All in all, modern technology has brought many benefits to our life, and I believe that it will keep improving our life in the future.

## ■写作积累

1. With the development of science and technology, our life is becoming more and more comfortable. 随着科技的发展,我们的生活变得越来越舒适。

2. Thanks to the advances in medicine, we can enjoy a healthier and longer life than before. 多亏了医学的进步,我们可以享受比以前更健康长寿的生活。

3. However, some people think we depend on technology so much that we are losing something valuable, such as face-to-face communication. 然而,有些人认为我们太过依赖科技以至于正在失去某些宝贵的东西,比如面对面的交流。

4. Only if we take advantage of technology properly, can we benefit a lot from it in the future.

只有我们正确地利用科技,将来我们才能从中获益良多。

## Part 4 Writing 实战演练

One possible version: Life in the Future

Sometimes I dream about what life in the future will be like.

Perhaps, some people will go to the moon for a holiday, while some will live under the sea. Maybe everyone will be living in smart homes, through which we can have an instant medical examination without leaving home. What's more, there is no need for children to go to school every day and they will start learning at home, because there will be more educational programmes on the Internet. Besides, in the future, each family will have robots, so every day what we only need to do is tell them what to do—shopping, sweeping the house and so on.

In a word, I'm optimistic about such a future life and I believe the dream will come true some day.
